

CaringINVESTMENTS

The Campaign Welcomes all Forms of Giving

- One-time gifts or multi-year gifts over a period of three to five years
- Gifts of cash, cheque or credit card
- Gifts of securities/stock

Tax Planning Points

- › If you donate securities that have increased in value, you receive a charitable tax receipt for the market value and the capital gains is eliminated. The Government of Canada removed capital gains tax on donations of securities to charities in 2006. Normally, you would have to report 50% of capital gains as income if you were to sell the securities.
- › If you sell losing securities and donate to charity, the capital loss may be applied against capital gains going back three years or carried forward indefinitely (you must wait 30 days before re-purchasing the security).
- › Charitable donations may be claimed in a given year up to 75% of your net income. If your donations exceed that threshold, the excess may be carried forward for five subsequent years.
